

Let It Lie

Let It Lie

Hans is the gardener of the "Cimetière des Rois". Through spring, summer, autumn, and winter, he watches flowers bloom, leaves fall, roots spread, and bodies return to the earth. Gifted with the power to influence the weather and the cycles of living things, he can influence in his environment at any moment. Yet every action impacts the world around him and risks disrupting its cycle. Gradually, Hans discovers that caring does not always mean acting. Across four day-and-night cycles, he is confronted with the same question: does this moment call for his intervention, or simply for his presence?

Finally, what if the most caring thing to do is sometimes to let things follow their own course - to let it lie?

User Journey

As Hans, the player experiences a full year in the "Cimetière des Rois", unfolding across four seasons and eight day-and-night cycles. During each cycle, they observe the evolution of three layers - sky, surface, and earth - and may choose to influence certain natural phenomena or let them follow their own course.

Their actions shape the ecosystem and affect subsequent cycles. As the seasons pass, the player gradually discovers that not every situation calls for intervention.

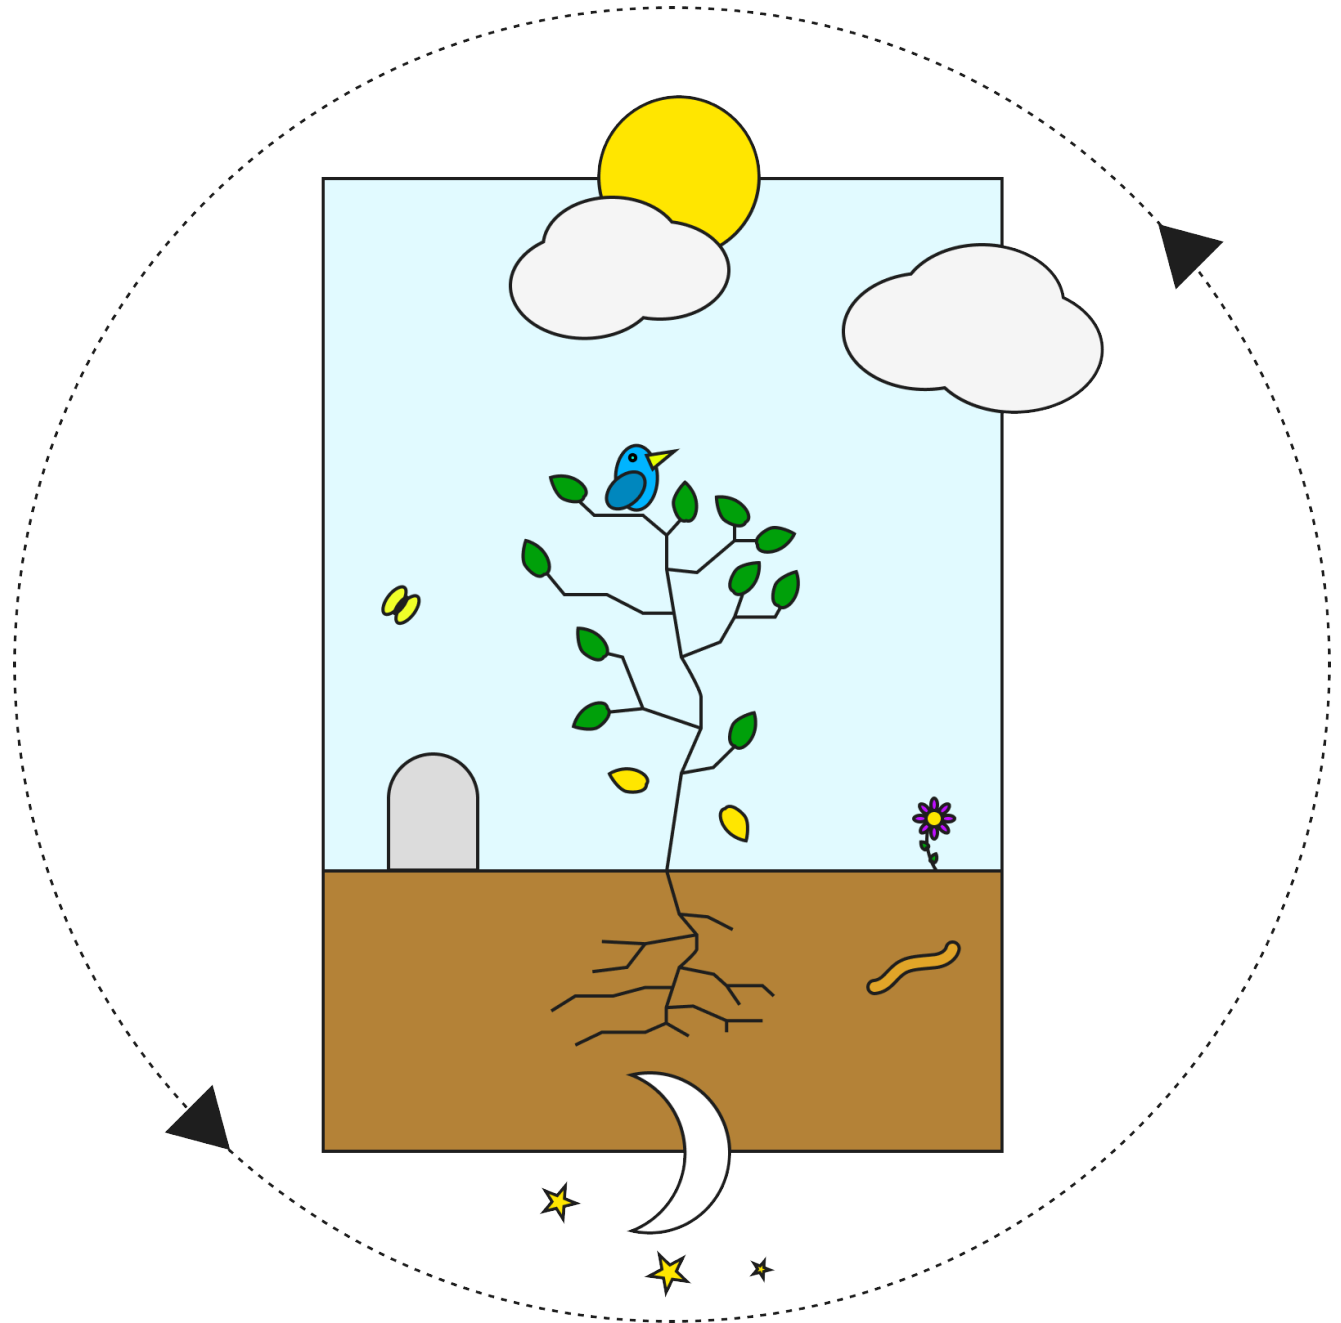

The experience explores the tension between acting and letting be.

Key interactions

- | | | |
|-----------------|------------------|--------------------|
| 1. Hold | Accelerate time | Exhausts nature |
| 2. Click | Collect elements | Interrupts cycle |
| 3. Drag | Create wind | Disturbs ecosystem |

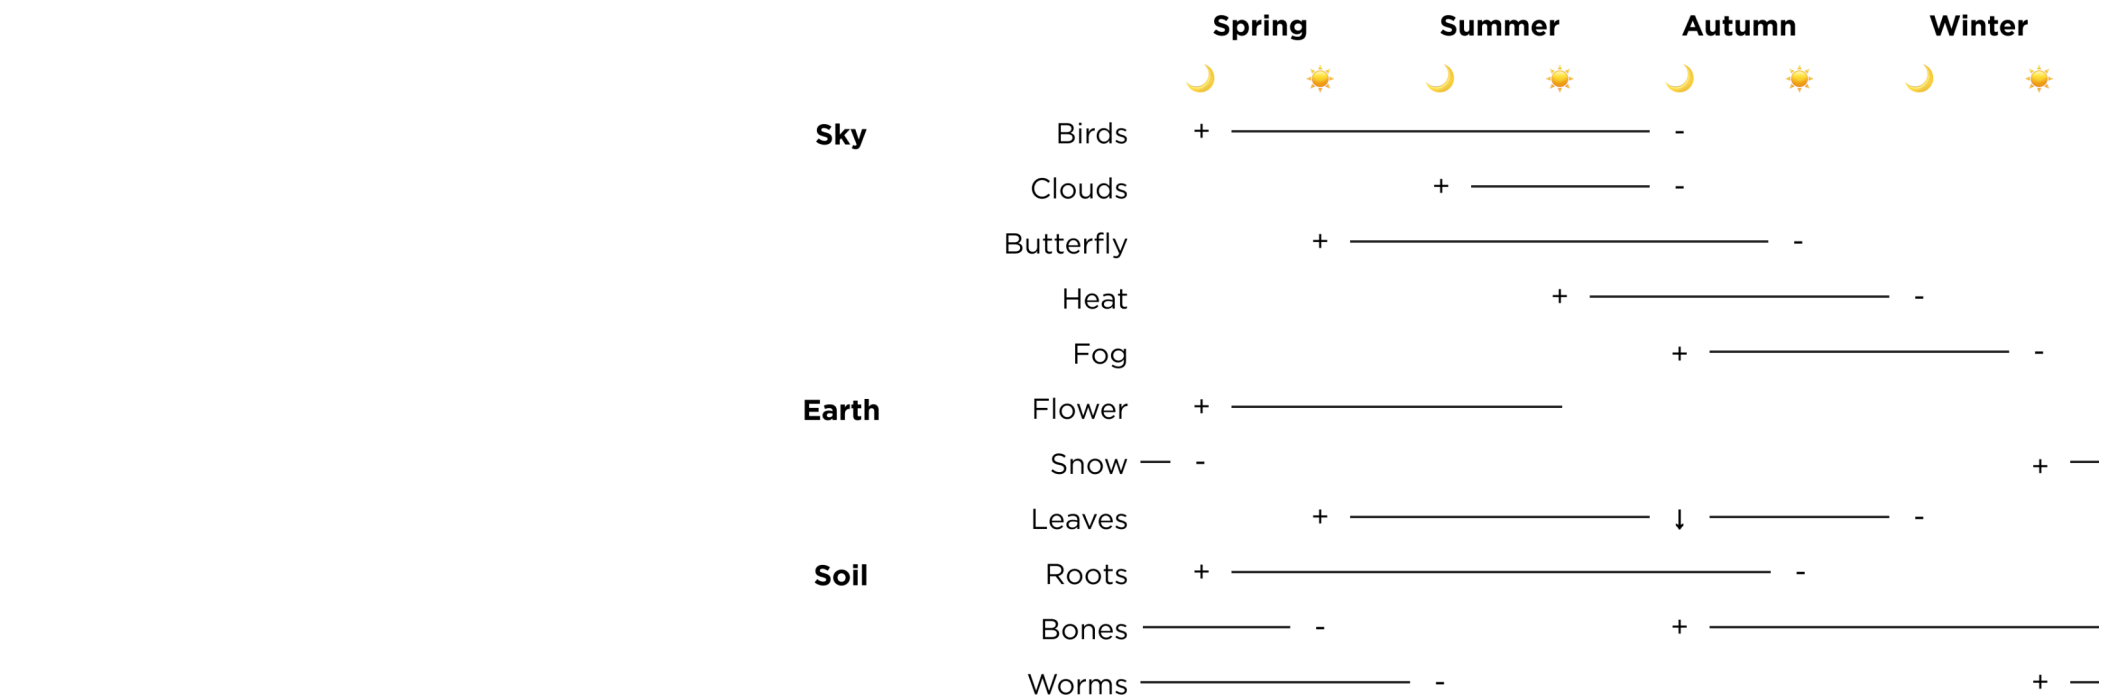

4 Seasons 2 Cycles

Summer	[☾ - ☀]
Autumn	[☾ - ☀]
Winter	[☾ - ☀]

Timeline

The timeline illustrates the appearance, transformation, and disappearance of natural phenomena throughout the year.

Final Production

List of features and elements that could be added to the final version, ordered by priority.

Thing	Type	Description	Estimated time (days)
Refactoring	Global	Code stabilization and cleanup	1
Kankyō Ongaku	Audio	Evolving environmental ambient soundtrack	1
Birds	Asset	React to the health of the environment (sing more or less)	0.5
Collect	Interaction	Gestures and behavior related to the act of collecting	1
Moss	Interaction	Regrows on gravestones during autumn	0.5
Bones	Asset	React to soil quality	0.25
Heat	Effect	Add a blur/humidity effect during summer	0.25
Snow	Effect	Falls during winter	0.25
Clouds	Effect	Springtime clouds	0.25
Icon + Splash Screen	Global	Visual assets	0.25
